Introduction

Steding & Sons Mercantile is proud to share 1836 Kratom. We strive to provide our superior products in the safest and most ethical way possible. We are an American Kratom Association GMP Qualified Vendor and we seek to constantly improve our knowledge and processes. Many of our team members and loved ones are kratom consumers, so we not only demand safe products for our customers, we demand them for ourselves and our families! We firmly believe in the potential of this plant and conscientiously advocate for it: encouraging responsible and ethical regulation, sales and consumption. Every lot of our kratom is tested, by accredited 3rd party laboratories, in the United States, and goes through our proprietary heat-sterilization process to help ensure a safer product. These lab results are shared on our website.

We gratefully support ongoing kratom studies at the University of Florida, contributing to the agricultural research of Dr. Brian Pearson and pharmacological research of Dr. Chris McCurdy. We are truly excited about the expanding knowledge and continuous progress toward deeper understanding of this incredible plant. We know that in order to continue unobstructed research, kratom must remain legal, so we sponsor the American Kratom Association as a Silver Level Consumer Champion. We are thankful for the incredible strides this organization has made in protecting consumer access to kratom.

Our company stands at the forefront of a cultural shift, serving our community with a focus on fitness and well-being: encouraging responsible kratom use as part of a healthy lifestyle. We are an American owned business, based in Austin, TX, founded by a husband, father, fitness enthusiast and musician. We strive to facilitate learning, kindness, compassion, love, health, wellness and freedom of choice. We seek to share our expanding knowledge with our customers and our abundance with those in need through recurring donations to charities we love. We are grateful for the wonderful customers that share our values. We understand that kratom may not be the right choice for everybody, so we encourage potential customers to seek credible information online and: Research. Reflect. Decide.

If you choose kratom, please choose 1836 Kratom! Thank you so much for considering.

Sincerely,

Jeremy Steding, Founder and President

WHAT IS KRATOM?

Kratom (*Mitragyna Speciosa*) is a cousin of the coffee plant, indigenous to Southeast Asia. Traditionally, the leaves have been brewed as tea and more recently, they have been dried and then crushed or powdered. A growing number of people believe kratom may have health and wellness benefits. Many Americans prefer powdered leaf kratom or capsules.

WHO USES KRATOM AND WHY? IS IT RIGHT FOR YOU?

A growing number of people, recently estimated at 15 million Americans, are believed to use kratom annually. Many people, including a number of doctors, fitness enthusiasts and health professionals believe kratom to have health benefits. Benefits reported include increased energy, focus, relaxation and relief from discomfort or fatigue. At Steding & Sons Mercantile we value the right of the consumer to make informed choices about their health and wellness. We encourage all potential kratom consumers to seek credible research from multiple sources and make decisions in alignment with their personal value system.

IS KRATOM SAFE?

Kratom has been used safely in southeast Asia for hundreds of years and millions of Americans are currently believed to be using kratom safely. American researchers are studying the safety profile of the plant. We encourage consumers to seek credible information. At Steding & Sons Mercantile, we believe that kratom is best used in moderation and note that many extract products have considerably higher alkaloid concentrates than natural kratom. We encourage extra consideration when making decisions about whether to use extract products and how often. At Steding & Sons Mercantile we encourage education, moderation and responsible consumption.
